Driving Innovation In Alternative Ironmaking

WE PROVIDE FURNACE SOLUTIONS.

As EAFs expand into higher grades, there will continue to be a growing need for Alternative Ironmaking Technology. We can help.

Berry Metal Company’s expertise lies in Furnace Technology and Operations, including Alternate Ironmaking. Over the past two decades we have been responsible for key equipment design for Hismelt® and HIsarna® technology and led the development of the AISI Flash Ironmaking process—a new iron making technology using Hydrogen to make clean iron units.

From innovative design of equipment to development and improvement of new direct reduction and smelting processes. We are the Technology Trailblazer.
