Berry Wins Contract for Lime Injection System.

Berry Metal Company has announced that it has won the contract to provide a complete Lime Injection package to a premier Southeastern-USA EAF producer.

Berry was approached by the client to solve their unique specific lime injection requirement from engineering to installation and commissioning. Our team examined the situation and worked with the client to develop the right system for the company's growing operations.

The scope of the Lime Injection package includes engineering, design and supply of outside conveyance, storage, inside conveyance and EAF Injection equipment solutions. As an integral part of this package is our unique patented and proven Air-Assist system to promote better material flow of Lime from silos to the EAF.

For more information, or if you have a unique project need, please contact us at 724-452-8040.
