

# A WATERLESS EAF BURNER?

## WE DID THAT BY DESIGN.

**V-MAX™ WATERLESS BURNER ASSEMBLY**

The Waterless Two Piece V-Max™ Burner is a breakthrough in EAF technology. Engineered to work with our Duraforge™ Box, the Waterless Burner extends campaign life and reliability, improves monitoring and control, while enhancing maintenance/safety.

Elimination of the pressurized burner circuit removes a leak source while real time monitoring of the metal temperature of the Duraforge™ Box simplifies detection. So you can identify a problem faster and take action before the issue causes overheating.

### **WATERLESS V-MAX™ BURNER BENEFITS:**

- Elimination of Hoses and Potential Leak Source
- 2 Piece Design Reduces Weight
- Pull Insert Rather Than Complete Assembly
- Easier, Safer Maintenance and Repair
- Much Longer Service Life
- Enhanced Feedback and Control
