# DATA DRIVING INNOVATION FORWARD

Berry Metal is driving EAF digitalization forward. Through innovative engineering we capture the real time data you need for enhanced process control, optimization and predictability.

## WE KNOW WHAT'S GOING ON INSIDE

- **TempSpec** –Innovative technology for continuous real-time temperatures at the LMF and while under vacuum at the VTD.
- **ArcSpec** –Real-time digital view inside your EAF while in operation. Measure, control and optimize your EAF in real-time.
- **EAF Inspection System** –Real time, 360-degree high resolution camera inspection system.

Through our partnership with Luxmet, Berry Metal is able to add patented technology to our EAF solutions and help customers drive digitalization forward.

**INNOVATION:** Partnering in solutions you can trust.
